F1 06 is a real time, 3D formula racing game with a number of features to enable the player to create and drive their own Formula 1 cars. There is a real time, variable driver view that offers exceptional realism and a fully detailed environment that has been written in the game engine from the ground up. This game has a game engine that allows for the creation of custom car models, environments and the ability to drive a range of classes including Formula One cars, GT cars, touring cars, rally cars and many more. Each car is fully modifiable and can be turned into a real time physics car that is extremely flexible and realistic. A full range of physics can be set to control suspension, steering, braking and more. More than 25 different engine tuning options provide the player with the ability to generate power from virtually any car to get the desired power and performance. The F1 06 game engine allows for a dynamic simulation of race conditions through multiple race types including qualifying, normal and endurance races. Each race type gives an opportunity to earn points to achieve different ranks and podium positions. The game engine also allows for highly realistic damage to the car and transmission that develops with every corner. As the player progresses through the career, they will be able to upgrade the cars suspension, brakes and engine. The career mode also includes full

For all $x,y\in\R^2$, define the set $\overline{\Omega}_x=\overline{\Omega}\cap \{x\}^\perp$, $\Omega_y=\Omega\cap\{y\}^\perp$ and Ω_{xy} be the conic section $\overline{\Omega}_{x}\cap \overline{\Omega}_{y}$. \[cor:cts\] Let $\mathcal{E}$ be a topological space and let $U\subset \R^2$ be a basic open set. If $f:\R^2\rightarrow\R$ is continuous on U, then there exists $A\in\mathcal{E}$ and $B\in\mathcal{E}$ such that $f\in U\mapsto A\cap B$ is continuous on $\overline{\Omega}_x\cap \overline{\Omega}_{xy}$. Moreover, if $\Omega\subset\R^2$ is a convex body, the result holds for f only continuous on U and ω-continuous on $\overline{\Omega}_x\cap \overline{\Omega}_{xy}$. \[re:in\] As mentioned in the introduction, the results of [@in:2005 3e33713323
