## File Marker Activation Code With Keygen [Updated]

File Marker is a lightweight software application whose purpose is to help you catalog and organize your files into custom categories. Portable running mode You can take advantage of the program's portability status and run it by simply opening the executable file (there's no installation included in the process). No settings files are left behind on the host computer. You may copy the tool on USB flash drives to have it with you all the time. Catalog management features Sporting a clean and straightforward interface, File Marker makes it easier for you to configure the dedicated parameters. The utility gives you the possibility to work with several preset categories, such as Movies, Music, PDF, Document, and Programs. In addition, you are allowed to set up your own categories by specifying the name and assigning a suggestive image, as well as edit or delete categories. In each category the application offers you the freedom to add files. You only need to point to the location where the items are stored. Additionally, you may add multiple file paths for each category and delete or refresh the folders. File Marker does not reveal comprehensive information about the files displayed in the main window; it only shows details about the filename and extension. A single click on a target file helps you open the item via your default program. What's more, you are allowed to rate each file using the built-in slider, sort items by name or rating, reset the entire rating system with a single click, view the total number of items, as well as filter the results by viewed or not viewed items. Conclusion To sum things up, File Marker proves to be an easy-to-use cataloging program that has to offer basic features, and is ideal especially for less experienced users. Structure and Features FileMarker is a tool that can be used as a catalog manager of files stored on your computer. With this software, you can create and edit your own custom categories, organize and arrange files into groups, and rate each file based on the total number of viewed files or as you like. It also contains the features to filter your file lists and organize your files by date. FileManger is a portable application with a clean and easy to use user interface. The interface is easy and intuitive to use, and consists of only one window, containing one large list of categories, along with a rating slider and a double-click bar.
