Writing down something when they come across a line of interest, and sometimes finding it easier to remember later. Until now, of course, this note-book technique would have involved carrying around another book, or writing out details on bits of paper, and tearing them out of the book when you got Most of us already use dictionaries to look up words, in fact we use them all the time, you know. Most of us already use dictionaries to look up words, in fact we use them all the time, you know. But dictionaries have their limitations. For instance, they can often be too general to be very useful, or they can be confusing if you know how to read - "What is a'synonym'? It's a word that sounds a bit the same as the word What words can you not seem to remember very easily?
